Desiltation of Tunga Bhadra Dam

1657. SHRI H.K. JAVARE GOWDA: Will the Minister of WATER RESOURCES be pleased to state:

(a) whether it is a fact that siltation in Tunga Bhadra Dam in Karnataka has reduced its storage capacity and the tail-end farmers are not getting required water for the crops;

(b) if so, whether Government propose to take steps for desiltation of the Dam and the approximate cost of desiltation; and

(c) the responsibilities of Government and the State Government of Karnataka towards cost bearing for desiltation?

THE MINISTER OF STATE IN THE MINISTRY OF WATER RESOURCES (SHRIMATI BIJOYA CHAKRAVARTY): (a) The live storage capacity of the Tungabhadra Reservoir has reduced from 3718 Million Cubic Meter (Mcum) in 1953 to 3157 Mcum as per Survey done in 1993 due to siltation. Reduction in live storage due to siltation, which is a natural phenomenon, will have an effect on the design irrigation potential.

(b) and (c) It is not techno economically feasible to desilt reservoirs.
